Hexagon Purus Q2 2025

Key figures

| (NOK million) | Q2 2025 | Q2 2024 | Change | YTD 2025 | YTD 2024 | Change |
|---|---------|---------|--------|----------|----------|--------|
| Revenue | 193 | 529 | -63% | 424 | 936 | -55% |
| Operating profit before depreciation (EBITDA) | -161 | -97 | - | -403 | -194 | - |
| Operating profit (EBIT) | -227 | -147 | - | -531 | -288 | - |
| Profit/loss before tax | -273 | -224 | - | -660 | -391 | - |
| Profit/loss for the period | -272 | -221 | - | -657 | -386 | - |

Key developments in Q2 2025 and after balance sheet date

- Quarterly revenue of NOK 193 million in the second quarter of 2025, 63% lower compared to same quarter last year;
- EBITDA of NOK -161 million in the second quarter of 2025, compared to NOK -97 million in the same period last year;
- Signed new supply agreement with Hino Trucks for supply of class 6 & 7 battery electric trucks to the U.S. market and initiated process to explore options for the BVI segment;
- Exited the quarter with order backlog consisting of firm purchase orders of approximately NOK 1.1 billion.

A word from the CEO

The first half of 2025 has certainly been a challenging time for Hexagon Purus. The policy shift in the US on clean energy and global trade created significant regulatory and market uncertainty. And the preparation of the recently approved tax legislation (OBBBA), targeting further cuts in clean energy and zero-emission mobility incentives, added to the uncertainty. Faced with this situation, market participants held back on long-term investment decisions, resulting in a weak market sentiment and low customer demand. In Europe, unlike in the US, the support for clean energy is strong at EU level, but the lack of consistent regulatory support and policy implementation at national level has delayed many new clean energy projects and slowed the momentum.

With this market backdrop, Hexagon Purus had a tough second quarter. Revenue for the quarter was NOK 193 million, which is 63% lower than the second quarter of last year, mainly driven by low hydrogen infrastructure demand. However, we have experienced increased order intake in recent months, and we have a good order book for the second half of the year. We also continue to see strong commercial momentum for our hydrogen transit bus applications in Europe, and the North American aerospace business is positively impacted by higher launch activity in the US, with growing demand and higher order intake.

We expanded our relationship with Hino Trucks in the second quarter, signing an agreement to supply complete Class 6 & 7 battery electric straight trucks for the North American market. These trucks will serve back-to-base operations in urban areas and complement our existing Class 8 city- and regional truck offering, utilizing the same technology and production facilities. Despite the lack of support from the federal government, we see strong interest from many fleet operators in signing up for customer trials. Several states, with California in the lead, are keeping incentives in place for zero-emission heavy-duty trucking. As a result, we expect the market for our Battery Systems and Vehicle Integration business to develop positively in the years ahead. To realize the growth potential of that business unit, we have initiated a structured process to generate alternatives.

The demand picture for the Hydrogen Mobility and Infrastructure business continues to be mixed across applications. The transit bus area remains robust, but the full-year demand for our hydrogen distribution modules will be substantially lower in 2025 compared to last year. Our hydrogen business has been positioned for continued growth and has capacity costs that require higher volume to achieve profitability than we currently expect. Consequently, we are reducing costs to achieve profitability at lower volume, while retaining the flexibility to scale up when market conditions improve.

The cash outflow in the first half of the year has been significant, mainly due to low volume. In addition, the Group incurred restructuring costs related to downsizing, spillover capex from 2024, and has had limited working capital release. Cash outflow is expected to be materially lower in the second half, supported by a stronger order backlog that underpins higher revenue, lower costs as the cost reduction program takes effect, reduced capex, and increased working capital release.

After a period where many customers held back on new business, we see increased customer activity and order intake. It has become clearer to us what kind of market we can expect in the near term and to what degree we must right-size the organization to ensure that we enter 2026 with a cost base that supports our journey towards profitability. With the many steps we are taking to adjust to the new reality, I remain confident in our ability to navigate through the current challenges and market environment.

I dudel ~

Morten Holum Chief Executive Officer, Hexagon Purus

Hexagon Purus Q2 2025 consolidated financials

Profit and loss

In the second quarter of 2025, Hexagon Purus ("the Company" or "the Group") generated revenue of NOK 193 million, down 63% compared to the corresponding period in 2024. The main reason for the revenue decline was significantly lower activity in the hydrogen infrastructure and hydrogen heavy-duty mobility application areas, partly offset by higher revenue from aerospace applications and battery electric mobility. Revenue for the first half of 2025 totaled NOK 424 million, representing a 55% decline compared to the same period last year, driven by the same factors that impacted the second quarter.

Cost of materials as a percentage of revenue was 52% in the second quarter of 2025, compared to 62% in the second quarter of 2024. Payroll-related expenses totaled NOK 152 million in the second quarter of 2025, representing a 22% reduction compared to the same period in 2024, reflecting most of the impact of the workforce reductions announced in February. Other operating expenses amounted to NOK 101 (103) million in the second quarter of 2025 and includes approximately NOK 24 million in non-recurring items, primarily related to bad debt expense due to an insolvent customer and a reassessment of historical VAT (see note 10 for further details). Total operating expenses in the second quarter of 2025 ended at NOK 355 (625) million, leading to an operating profit before depreciation (EBITDA) of NOK -161 (-97) million, equivalent to an EBITDA margin of -83% (-18%).

Depreciation and impairment in the second quarter of 2025 was NOK 66 million, up from NOK 50 million in the second quarter of 2024. Of the NOK 66 million, NOK 49 million relates to depreciation of property, plant & equipment and amortization of intangible assets, and NOK 15 million relates to right-of-use-assets (RoU) depreciation. Operating profit (EBIT) in the second quarter of 2025 ended at NOK -227 (-147) million.

Share of income from investments in associates, which reflects Hexagon Purus' minority shareholding in CIMC Hexagon Hydrogen Energy Systems Ltd., was NOK -3 (-2) million in the second quarter of 2025. Finance income in the second quarter of 2025 was NOK 39 (11) million, of which approximately NOK 6 million relates to interest income on bank deposits and approximately NOK 32 million relates to foreign exchange fluctuations. Finance expense in the second quarter of 2025 was NOK 82 (86) million, of which approximately NOK 62 million relates to non-cash interest on the 2023/2028 and 2024/2029 convertible bonds. A further approximately NOK 9 million is driven by interest on lease liabilities and

other interest-bearing debt, and approximately NOK 9 million relates to foreign exchange fluctuations. Tax expense in the second quarter of 2025 was NOK -1 (-2) million, and net profit after tax ended at NOK -272 (-221) million.

Balance sheet

Total assets at the end of the second quarter of 2025 amounted to NOK 4,266 (4,619) million. Inventory amounted to NOK 714 (611) million as of the end of the second quarter of 2025, and the majority of inventory consists of raw materials and work-in-progress. Inventory increased by NOK 56 million compared to the first quarter of this year, primarily driven by relatively low revenue during the period and the purchase of certain long lead-time components for the hydrogen infrastructure business in Europe and the aerospace business in North America, in preparation for a significant increase in activity expected in the second half of the year.

Trade receivables decreased sequentially by NOK 32 million in the second quarter of 2025 to NOK 244 (401) million. Cash collection from customers remains largely on track, with no significant exposures currently considered at risk. Cash and cash equivalents stood at NOK 527 (543) million at the end of the quarter.

Total equity was NOK 1,418 (1,847) million as per the second quarter of 2025, equal to an equity ratio of 33% (40%). The increase in non-current liabilities to NOK 2,222 (2,021) million is mainly driven by non-cash interest added to the principal of the two outstanding convertible bonds, partly offset by a reduction in lease liabilities to NOK 503 (524) million. Total current liabilities stood at 626 (751) million at the end of the second quarter of 2025, of which trade payables made up NOK 148 (250) million and which was sequentially down compared to the first quarter of 2025.

Cash flow

Net cash flow from operating activities in the second quarter of 2025 was NOK -197 (-232) million. Working capital increased by NOK 41 million in the quarter (NOK 120 million in Q2 2024), primarily due to higher inventory levels in preparation for increased activity in the second half of the year and a decline in trade payables. This was only partly offset by a reduction in trade receivables.

Net cash flow from investing activities was NOK -62 (-180) million in the second quarter of 2025, of which NOK 37 (133) million relates to investments in production equipment and facilities and is mainly spill-over items from 2024 related to the Company's capacity expansion program. Contributions to associated companies and other investments was NOK 23 (6) million in the quarter and capitalized product development was NOK 8 (4) million in the second quarter of 2025. Interest received on bank deposits in the second quarter of 2025 was NOK 6 (6) million.

Group capital expenditure (property, plant & equipment and capitalized product development) NOK million

Net cash flow from financing in the second quarter of 2025 was NOK -3 (-5) million. Cash interest payments and repayment of interest-bearing debt and lease liabilities amounted to NOK 22 (26) million in the second quarter of 2025, which was offset by a NOK 19 million capital increase in the Company's Chinese joint venture.

Net change in cash and cash equivalents in the second quarter of 2025 was NOK -262 (-417) million, and currency exchange differences on cash was NOK -5 (-5) million. Cash and cash equivalents ended at NOK 527 (543) million as of the second quarter of 2025.

Hydrogen Mobility and Infrastructure (HMI)

Hexagon Purus' hydrogen storage solutions are based on its leading type 4 cylinder technology and enables the safe and efficient use of hydrogen in a variety of zeroemission mobility and hydrogen infrastructure applications. The Hydrogen Mobility and Infrastructure (HMI) segment covers Hexagon Purus' hydrogen cylinder and systems manufacturing activities in Europe and North America, as well as its aerospace and industrial gas business.

Financial development

Revenue for the HMI segment in the second quarter of 2025 was NOK 164 million, down 69% compared to the corresponding period last year. The decline in revenue is primarily owed to lower activity within hydrogen infrastructure and heavy-duty hydrogen mobility, which is only partially offset by higher year-over-year revenue from aerospace applications. Revenue-mix wise, only 10% (62%) of the HMI segment revenue in the second quarter of 2025 stemmed from hydrogen infrastructure solutions and amounted to NOK 16 (329) million, down 95% year-over-year. Within hydrogen infrastructure solutions, hydrogen distribution solutions made up most of the revenue in the quarter.

Hydrogen mobility, which covers revenue from the sale of type 4 hydrogen cylinders and cylinder systems for hydrogen-powered on-road and off-road vehicles, was down 40% year-over-year to NOK 88 (147) million in the second quarter of 2025 and made up 54% (28%) of total HMI segment revenue. 95% of the hydrogen mobility revenue in the second quarter of 2025 stemmed from transit bus applications and amounted to NOK 84 (89) million. As in the first quarter of this year, activity within the hydrogen heavy-duty vehicle application area remained muted and recognized NOK 4 (55) million of revenue in the second quarter of 2025.

Revenue from the Company's industrial gas business—providing stationary storage solutions primarily for air gases such as nitrogen and oxygen—amounted to NOK 27 million in the second quarter of 2025, representing a 21% decline compared to the same period last year, mainly due to timing differences. The Company's aerospace activities, which supports privately held space exploration companies in North America with storage solutions for space expeditions, grew by 88% year-over-year in the first quarter of 2025 to NOK 29 (16) million. Combined, these application areas made up 35% (10%) of HMI segment revenue in the second quarter of 2025.

EBITDA for the HMI segment in the second quarter of 2025 ended at NOK -76 (17) million, equivalent to an EBITDA margin of -47% (3%) as the sharp decline in revenue reduced the segment's ability to absorb its fixed costs combined with a less profitable product mix.

Operational update

The HMI business unit has this year focused on executing cost measures to enable profitability at lower volumes, while preserving the flexibility to scale operations when market conditions recover.

The global macroeconomic and political environment remains challenging, with recent policy shifts—particularly in the United States—negatively affecting investment decisions among the Company's customers. One example is the previously announced supply agreement with GILLIG for hydrogen fuel storage systems for fuel cell electric buses, which is now unlikely to proceed as planned and is likely to be postponed or cancelled. The Company continues to see activity for European hydrogen transit buses and aerospace in the US, but significantly weaker demand so far this year for hydrogen infrastructure solutions has improved in recent months and the Company now has a solid order backlog of hydrogen distribution modules for execution in the second half of this year.

Despite the improved order intake, the Company continues to adapt its cost base and plans to reduce the workforce in the HMI segment further in the second half of 2025. This step is aimed at aligning costs with the near-term demand outlook, while maintaining the Company's commitment to safety, quality, and delivery performance. Including the reductions announced earlier this year, this second round of measures is expected to result in a total workforce reduction in Germany of approximately 30% compared to 2024 levels.

Battery Systems and Vehicle Integration (BVI)

The Battery Systems and Vehicle Integration (BVI) segment covers Hexagon Purus' industry-leading battery storage systems technology and complete vehicle integration services for medium- and heavy-duty trucks in North America.

Financial development

Revenue for the BVI segment in the second quarter of 2025 was NOK 25 (2) million. The year-over-year revenue growth was mainly driven by vehicle deliveries of the Tern RC8 to Hino Trucks as well as deliveries of battery systems to Toyota Motors North America. EBITDA for the BVI segment ended at NOK -31 (-60) million in the second quarter of 2025.

Operational update

Regulatory support for zero-emission mobility has weakened under the new U.S. administration. However, several states—most notably California—maintain their commitments, and a range of incentive programs for zero-emission heavy-duty trucks remain in place across the country. Demonstration trucks for the Tern RC8 (Class 8) program have been delivered to dealers and potential customers, and trial programs with key national accounts are set to continue in the second half of the year. While initial feedback has been encouraging, definitive outcomes from these trials and any resulting purchase orders are not expected before the first quarter of 2026.

In addition, Hexagon Purus and Hino Trucks strengthened their partnership during the quarter by entering into a supply agreement for Class 6 and 7 battery electric straight trucks for the U.S. market. These trucks are built upon the existing Class 8 program but is expected to carry the Hino brand and are planned for general sale through Hino's

nationwide dealer network starting in 2026. An initial series of prototype vehicles is scheduled for delivery in Q4 2025. Furthermore, the Company has initiated a structured process to generate and evaluate alternatives for BVI. This could include, but is not limited to, inviting one or more partners into the BVI business unit or finding other structural solutions.

Outlook

Commercial momentum and revenue contribution remain solid within hydrogen transit buses in Europe and aerospace in North America. However, the ramp-up of the BVI business unit remains delayed relative to prior expectations. Revenue from the hydrogen infrastructure segment is significantly down year-over-year, although the current order backlog indicates a notable increase in activity in the second half of 2025, which should improve Group revenue and profitability. The anticipated revenue increase should also support a more favorable working capital development especially towards the end of the year, and capital expenditure is expected to decline as investments from 2024 related to the capacity expansion program near completion. Together, these factors are expected to meaningfully reduce cash outflow over the remainder of the year.

The Company remains focused on cost reductions to support profitability at lower volume, while concurrently reviewing its business portfolio. Including the measures announced in this report, the total expected reduction in annualized operating costs from 2026— compared to 2024 levels—is estimated to be up to NOK 350 million, assuming all else is equal, exceeding the NOK 200m cost reduction target announced in February by NOK 150m.

Together, the ongoing portfolio review and cost-cutting initiatives are aimed at making the current cash balance last until the Company reaches EBITDA and cash break-even.

Forward-looking statements

The forward-looking statements made above are, by their nature, subject to significant risks and uncertainties because they relate to events and depend on circumstances that are expected to occur in the future. They are therefore not guarantees of future performance. While the statements reflect the current views and expectations of Hexagon Purus based on information currently available to it, they are subject to various assumptions, in addition to risks and uncertainties that may be outside of its control.

Hexagon Purus cannot provide any assurance that the assumptions underlying such forward-looking statements are free from errors nor accept any responsibility for the future accuracy of the opinions expressed herein, or the actual occurrence of the forecasted developments. Actual results could differ materially from those expressed or implied in forward-looking statements. Any forward-looking statements are based only on conditions as of the date on which they are made and we are under no obligation to update or alter such forward-looking statements whether as a result of new information, future events or otherwise.

Risks and uncertainties

Hexagon Purus operates in markets with strict standards for quality and delivery, deviations from which could result in significant additional costs, lost sales and damage to the Group's reputation. The Group is exposed to production-related risks such as production errors or shutdowns of its facilities, which could have a material adverse effect on the Group's results of operations, cash flow and financial condition.

The Group is exposed to competing technologies and processes that could have a negative effect on the Group's competitive positioning, and in turn profitability and financial position.

The Group is exposed to developments in the prices and availability of its raw materials and in particular the cost of carbon fiber and lithium-ion batteries. The prices and availability of these raw materials are linked to various factors including developments in the price of oil, precursor commodities and energy and the prevailing market balance where supply is dependent on a limited number of suppliers. To mitigate the risk, the Group will from time to time enter into long-term supply agreements, locking in price and quantity. Even though the contracts are intended to mitigate supply risk, it would also potentially add risk, as they commit the Group on material and components, where actual demand can turn out to be lower than forecasted, market prices can fall, or the development could make the committed volumes technologically less relevant.

To the extent the Group does not generate sufficient cash from operations to fund its existing and future business plans, the Group may need to raise additional funds to execute its growth strategy and to fund capital expenditures. Adequate sources of capital funding might not be available when needed or may only be available on unfavorable terms. If funding is insufficient at any time in the future, the Group may be unable to, inter alia, fund acquisitions, take advantage of business opportunities or respond to competitive pressures, any of which could adversely impact the Group's financial condition and results of operations.

The Group is also exposed to global macroeconomic developments including the impact of inflation, supply chain constraints and rising interest rates. In recent years, there have been several hydrogen initiatives from governmental and international bodies around the world which puts a spotlight on the role hydrogen technology can play in the global energy transition. The Group faces potential impacts from changes to current and future incentives related to decarbonization or ESG topics, which could affect the adoption of hydrogen or battery electric technologies and, consequently, the

Group's performance. Additionally, shifts in policies and legislation following changes to government may introduce new regulatory challenges and support for clean energy initiatives, posing further risks to the Group's performance. It is not possible to know the precise impacts of such developments and to what extent these may or may not persist.

Changes in international trade policies, including the imposition of new tariffs or adjustments to existing ones, may impact Hexagon Purus's cost structure and supply chain reliability. Tariffs on key raw materials or components could increase input costs, potentially affecting margins and pricing strategies. Additionally, evolving trade relations and regulatory shifts in key markets can introduce uncertainty that may influence investment decisions, production planning, and global market access.

For additional information about risks and uncertainties we refer to Hexagon Purus' 2024 annual report.

Statement from the Board and CEO

To the best of our knowledge, we confirm that:

- The consolidated and unaudited financial statements for the period 1 January to 30 June 2025 have been prepared in accordance with IAS 34 *Interim Financial Reporting*,
- The information presented in the half-year report provides a true and fair view of the Group's and the Company's assets, liabilities, financial position, and results for the period as a whole;
- The report also includes a fair review of important events during the period, the principal related party transactions, and a description of the key risks and uncertainties facing the Group for the remainder of the financial year.

Note 1: General information and basis for preparation

The condensed consolidated interim financial statements for the first half 2025, which ended 30 June, comprise Hexagon Purus ASA and its subsidiaries (together referred to as "the Group"). Hexagon Purus ASA, the parent of Hexagon Purus Group, is a public limited liability company with its registered office in Norway. The company's headquarters are at Haakon VII's gate 2, 0161 Oslo, Norway. Hexagon Purus ASA is listed on Oslo Børs, under the ticker HPUR.

The condensed consolidated interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting. For a more detailed description of accounting principles, reference is made to the consolidated financial statements for the year ended 31 December 2024, available on the Company's website: www.hexagonpurus.com/investors. The accounting principles used in the preparation of these interim accounts are generally the same as those applied to the annual consolidated financial statements referred to above. The Group has not adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

These condensed consolidated interim financial statements were approved by the Board of Directors on 16 July 2025.

Note 2: Estimates

The preparation of the interim accounts entails the use of valuations, estimates and assumptions that affect the application of the accounting policies and the amounts recognized as assets and liabilities, income, and expenses. The actual results may deviate from these estimates.

The material assessments underlying the application of the Group's accounting policy and the main sources of uncertainty are the same as for the consolidated accounts for 2024.

Convertible bonds

The Company has two outstanding senior unsecured convertible bonds (2023/2028 and 2024/2029) amounting to 1,799,950 million at the respective time of issuance.

The 2023/2028 convertible bond with an outstanding amount of NOK 800,000,000 was issued in March 2023 and carries a fixed interest rate of 6% paid semi-annually in kind, through issuance of additional bonds. The conversion price of the bond is set at NOK 32.64, and the conversion right can be exercised at any time between the loan issue and the last conversion date, which is set to 16 March 2028, being the date which is 5 years after the Shareholders' Meeting that resolved the convertible bond. Mitsui & Co., Ltd. ("Mitsui"), which subscribed for an amount of NOK 500,000,000 under the 2023/2028 convertible bond, entered into a 2-year lock-up on its investment in the 2023/2028 convertible bond, under which it may not transfer its bonds during this time period. Further, Mitsui entered into a 180-day lock-up for shares received upon conversion prior to 3 years from the disbursement date of the 2023/2028 convertible bond. Furthermore, Mitsui has entered into an additional lock-up in respect of the 2023/2028 convertible bond and the 2024/2029 convertible bond, as described below.

The 2024/2029 convertible bond with an outstanding amount of NOK 999,950,000 was issued in February 2024 and carries a fixed interest rate of 10% paid semi-annually in kind, through issuance of additional bonds. The conversion price of the bond is set at NOK 12.20, and the conversion right can be exercised at any time between the loan issue and the last conversion date, which is set to 11 January 2029, being the date which is 5 years after the Shareholders' Meeting that resolved the convertible bond. Mitsui, which subscribed for an amount of NOK 500,000,000 under the 2024/2029 convertible bond, entered into a 2-year lock-up on its investment in the 2024/2029 convertible bond, under which it may not transfer its bonds during this time period. Further, Mitsui entered into a 180-day lock-up for shares received upon conversion prior to 3 years from the issue date of the 2024/2029 convertible bond, and a 90-day lock-up for shares received upon conversion after 3 years from the issue date of the 2024/2029 convertible bond, and a 90-day lock-up for shares received upon conversion after 3 years from the issue date of the 2024/2029 convertible bond, as described below.

On 25 September 2024, the Company signed an agreement with Mitsui where the parties have agreed that Mitsui shall not use a right to convert to ordinary shares or to dispose of any of its convertible bonds under the 2023/2028 convertible bond or the 2024/2029 convertible bond, without the written consent of the Board of Directors of the Company until the earlier of (i) the date on which the Company becomes profitable on a Profit After Tax (PAT) basis (measured by PAT attributable to equity holders of the parent in the Company's group income statement), and (ii) 1 January 2028 for the 2023/2028 convertible bond and 1 January 2029 for the 2024/2029 convertible bond, respectively (together referred to as the "Additional Lock-up"). The Additional Lock-up applies to Mitsui only, and the rights for other holders of the 2023/2028 convertible bond and 2024/2029 convertible bond and 2024/2029 convertible bonds are as per the original convertible loan agreements. The Additional Lock-up shall not apply in certain events, including the occurrence of a Corporate Transaction Event (as defined in the terms for the convertible bonds), event of default or tender offer relating to the Company. The terms of the existing lock-up undertakings provided by Mitsui, as described above, will remain in force.

The convertible bonds are compound financial instruments which contains an equity component and a debt component. Upon initial recognition, the debt component is calculated as the discounted value of the bond assuming no conversion with an approximate market interest rate for similar loans without the conversion feature as the discount rate. For calculation purposes, a 15% discount rate has been applied, yielding a fair value at initial recognition of the debt component of NOK 521.6 million for the 2023/2028 bond and NOK 790.3 million for the 2024/2029 bond. The equity component equals the residual difference between the fair value of the convertible bond at issuance and the fair value of the debt component and amounts thus to NOK 278.4 million for the 2023/2028 bond and NOK 209.7 million for the 2024/2029 bond. Transaction costs related to the bond issue amounted to NOK 23.1 million for the 2023/2028 bond and NOK 209.7 million for the 2024/2029 bond. Transaction costs related to the bond issue amounted to NOK 23.1 million for the 2023/2028 bond and NOK 26.8 million for the 2024/2029 bond. See summarized tables related to the convertible bonds below.

| Currency translation differences | -34 450 | 15 944 |
| Carrying value as of 30 June | 549 165 | 571 752 |

Lease liabilities are largely related to lease agreements for office- and production premises, as well as leases for production equipment, machinery and vehicles.

Note 8: Share-based payments

As of 30 June 2025, the Company had four share-based long-term incentive plans outstanding consisting of performance share units (PSU) and restricted share units (RSU).

| | LTIP 2025 | LTIP 2024 | LTIP 2023 | LTIP 2022 |
|---|----------------------|-------------|-------------|-------------|
| Performance share unit programs (PSU) | Issued December 2024 | Issued 2024 | Issued 2023 | Issued 2022 |
| As of 1 January 2025, number of instruments | - | 1 925 000 | 1 585 823 | 973 686 |

| As of 30 June 2025, number of instruments | - | 1 875 000 | 1 469 258 | 0 |
| Fair value – at grant date (NOK) | - | 7.74 | 22.57 | 33.99 |
| Vesting period | - | 3 years | 3 years | 3 years |
| Expiry | - | Q1 2027 | Q1 2026 | Q1 2025 |
| | | | | |
| Restricted share unit programs (RSU) | | | | |
| As of 1 January 2025, number of instruments | 4 840 000 | 960 000 | 109 284 | 73 080 |
| Grants | - | - | - | - |
| Lapsed/cancelled/vested | - | - | - | -73 080 |
| As of 30 June 2025, number of instruments | 4 840 000 | 960 000 | 109 284 | 0 |
| Fair value – at grant date (NOK) | 5.89 | 7.42 | 22.04 | 27.76 |
| Vesting period | 3 years | 3 years | 3 years | 3 years |
| Expiry | Q1 2028 | Q1 2027 | Q1 2026 | Q1 2025 |

PSU programs

All PSUs are non-transferable and will vest subject to satisfaction of the applicable vesting conditions. The actual number of PSUs vested will depend on performance and can vary from zero to the maximum awarded PSUs in each program.

RSU program

All RSUs are non-transferable and will vest subject to satisfaction of the applicable vesting conditions. The RSUs are subject to continued employment three years after date of grant, and each participant will at such time receive such number of Hexagon Purus shares as corresponds to the number of RSUs allocated to them.

The fair value of the PSUs are calculated on the grant date, using Black-Scholes and Monte Carlo simulation, and the cost is recognized over the service period. As of the second quarter of 2025, the year-to-date cost of the RSU and PSU schemes, including social security, was NOK 10.9 million. The unamortized fair value of all outstanding RSUs and PSUs as of 30 June 2025 is estimated to be NOK 41.7 million (NOK 44.0 million as of 30 June 2024). There are no cash settlement obligations.

Note 9: Investments in associated companies

| | | | Ownership share | Ownership share | Ownership share | | |
|---|-----------|------------------|-----------------|-----------------|-----------------|-------------------|--|
| Company | Country | Business segment | 30.06.2025 | 31.12.2024 | 30.06.2024 | Accounting method | |
| Cryoshelter LH2 GmbH | Austria | Purus | 40.0% | 40.0% | 40.0% | Equity method | |
| CIMC Hexagon Hydrogen Energy Systems Ltd. | Hong Kong | Purus | 49.0% | 49.0% | 49.0% | Equity method | |

Note 10: Operating expenses

• The Norwegian Tax Administration (NTA) has issued a preliminary reassessment for the fiscal years 2021–2022 related to VAT deductions and tax deductibility of certain historical costs. While the matter remains under discussion with the NTA, the Group has recognized a provision of NOK 20.1 million in the second quarter of 2025.

Note 11: Events after the balance sheet date

- In July 2025, Jon Erik Engeset was elected as Chair of the Board of the Company, succeeding Espen Gundersen, who continues as a Board member and Chair of the Audit Committee
- There have been no other significant events after the balance sheet date that have not already been disclosed in this report

Alternative Performance Measures (APMs)

Hexagon Purus discloses certain alternative performance measures (APMs) in addition to those normally required by IFRS as such performance measures are frequently used by analysts, investors and other parties as supplemental information to gauge the Group's operational and financial performance. The APMs are also used internally to drive performance in terms of monitoring operating performance and long-term target setting. APMs are adjusted IFRS measures that are defined, calculated and used in a consistent and transparent manner over the years and across the Group where relevant.

- Gross margin is defined as revenue less direct and indirect cost of goods sold, before selling, general & administrative expenses.
- EBITDA is defined as earnings before interest, tax, depreciation, amortization and impairment. EBITDA corresponds to operating profit/(loss) before depreciation, amortization and impairment.
- **EBIT** is defined as earnings before interest and taxes. EBIT corresponds to "operating profit" in the consolidated income statement in the report.
- Equity ratio is defined as total equity divided by total assets.
- Order backlog is defined as the estimated value of remaining work on firm purchase orders with agreed price, volume, timing, terms and conditions.
- Order intake is defined as the estimated value of firm customer purchase orders received during the period, with agreed price, volume, timing, and terms and conditions. Order intake reflects the net change in order backlog from one period to the next less revenue recognized in the period and any adjustments or cancellations.

Shareholder information

Forward-looking statements

This quarterly report (the "Report") has been prepared by Hexagon Purus ASA ("Hexagon Purus" or the "Company"). The Report has not been reviewed or registered with, or approved by, any public authority, stock exchange or regulated marketplace. The Company makes no representation or warranty (whether express or implied) as to the correctness or completeness of the information contained herein, and neither the Company nor any of its subsidiaries, directors, employees or advisors assume any liability connected to the Report and/or the statements set out herein. This Report is not and does not purport to be complete in any way. The information included in this Report may contain certain forward-looking statements relating to the business, financial performance and results of the Company and/or the industry in which it operates. Forward-looking statements concern future circumstances and results and other statements that are not historical facts, sometimes identified by the words "believes", expects", "predicts", "intends", "projects", "plans", "estimates", "anticipates", "anticipates", "targets", and similar expressions. The forward-looking statements contained in this Report, including assumptions, opinions and views of the Company or cited from third party sources are solely opinions and forecasts which are subject to risks, uncertainties and other factors that may cause actual events to differ materially from any anticipated development. None of the Company or its advisors or any of their parent or subsidiary undertakings or any such person's affiliates, officers or employees provides any assurance that the assumptions underlying such forward-looking statements are free from errors nor does any of them accept any responsibility for the future accuracy of the opinions expressed in this Report or the actual occurrence of the forecasted developments. The Company and its advisors assume no obligation to update any forward-looking statements or to conform these forward-looking statements to the Company's actual results. Investors are advised, however, to inform themselves about any further public disclosures made by the Company, such as filings made with Euronext Growth or press releases. This Report has been prepared for information purposes only. This Report does not constitute any solicitation for any offer to purchase or subscribe any securities and is not an offer or invitation to sell or issue securities for sale in any jurisdiction, including the United States. Distribution of the Report in or into any jurisdiction where such distribution may be unlawful, is prohibited. This Report speaks as of 16 July 2025, and there may have been changes in matters which affect the Company subsequent to the date of this Report. Neither the issue nor delivery of this Report shall under any circumstance create any implication that the information contained herein is correct as of any time subsequent to the date hereof or that the affairs of the Company have not since changed, and the Company does not intend, and does not assume any obligation, to update or correct any information included in this Report. This Report is subject to Norwegian law, and any dispute arising in respect of this Report is subject to the exclusive jurisdiction of Norwegian courts with Oslo City Court as exclusive venue. By receiving this Report, you accept to be bound by the terms above.
